Key Features

- Featuring a unique contoured pad, constructed from a high grade foam, which moves independently to provide excellent patient comfort, reduce shear and friction and optimise pressure reduction. In turn, this allows excellent conformity when profiled on electric bed frames.
- The outer cover is a multi-stretch, waterproof, polyurethane fabric with sewn seams and a full length flap concealing the zip. These features combine to effectively reduce the ingress of fluid into the mattress.
- The mattress cover can be wiped down or completely removed and laundered up to 95°C to aid decontamination protocols.
