Memo-Form Pressure Reducing Mattress

The Memo-Form pressure reducing mattress features a high density visco-elastic foam surface inlay, ideal for delivering exceptional patient comfort and a high degree of pressure reduction. The temperature sensitive foam conforms to the individual's shape, creating a greater body contact area and effective pressure redistribution. Designed to meet the demands of the hospital and community healthcare environments the Memo-Form is suitable for those considered at 'High Risk' of developing pressure ulcers.

Key Features

- High specification foam contributes to an effective pressure ulcer prevention plan.
- Internal air channels in the foam's surface help to reduce the build up of heat and moisture on the skin.
- Smooth multi-stretch cover allows the patient to glide over the surface of the mattress.
- Individually castellated cells conform independently.
- The waterproof, vapour permeable cover can be easily wiped clean.
- High frequency welded seams reduce the risk of fluid ingress.
- Full length welded flap cover can be removed and laundered at 95°C.
