Arise 1000 Bariatric Dynamic Surface

The Arise 1000 is a fully integrated therapy system that combines pressure redistribution with low air loss in a sleep surface that expands easily in width and length offering more space for patient care, also ensuring the lowest possible pressures at all times. Bariatric patients respond favourably to being nursed on a low air loss surface as the air flow helps to reduce a build-up of sweat and therefore maceration and can assist to maintain drier skin.

The Arise 1000 mattress replacement system is suitable for both the treatment of existing pressure ulcers category I-IV as well as for patients who have been assessed to be at risk from complications of immobility. The Arise 1000 allows facilities to provide relief and manage high costs associated with clinical treatment and recovery time.

Technical Specification;

Mattress dimensions	122cm (48") W x 203cm (80") L x 22cm (8.5") H
Maximum patient weight	455kg/72st
Mattress weight	11kg/24lbs
Controller weight	4.5kg/10lbs
Controller dimensions	34cm (13.5") W x 28cm (11") H x 19cm (7.5") D
Modes	Autofirm, pulsate and therapy
Indications	Suitable for both the treatment of existing pressure ulcers Category I-IV as well as for patients who have been assessed to be at risk from the complications of immobility
