AliMed® Bariatric Bed Pan w/Anti-Splash

AliMed® Bariatric Bed Pan with Anti-Splash supports any size patient up to 1,200 lbs, making it the only bed pan a facility needs. Unlike standard bed pans, AliMed's Bariatric Bed Pan has a low 1/2" rim at the back of the pan for easy insertion and removal, helping to ease strain on nurses' backs while increasing patient comfort. The low profile with wider seat allows patients to glide easily onto the pan without needing to unnaturally arch upward over the pan. Steam autoclavable up to 220°F or sanitize using standard facility cleaning and sanitizing protocols.

- Stronger, wider, and easier to use than other bed pans
- 1,200-lb. weight capacity
- Wider seat for better patient comfort
- Easy placement, easy removal
- Anti-splash, anti-spill
- Fully autoclavable and reusable
- High-impact polythene
